

# Electron Js + ( React Js + TypeScript )

---

## Redux Store + Electron Store

```
npx create-react-app ert-1 --template typescript
```

```
npm i -D concurrently electron electron-builder electron-forge electron-packager wait-on @electron-forge/cli @electron-forge/maker-deb @electron-forge/maker-rpm @electron-forge/maker-squirrel @electron-forge/maker-zip
```

```
npm i --save axios react-bootstrap bootstrap@4.6.0 cross-env electron-is-dev electron-squirrel-startup electron-store jsonwebtoken lodash p5 react-p5 react-p5-wrapper os-utils redux react-redux react-router react-router-dom react-bootstrap-icons
```

```
npm i --save ml5 --force
```

```
npx create-react-app ert-4 --template typescript ; npm i -D concurrently electron electron-builder electron-forge electron-packager wait-on @electron-forge/cli @electron-forge/maker-deb @electron-forge/maker-rpm @electron-forge/maker-squirrel @electron-forge/maker-zip ; npm i --save axios react-bootstrap bootstrap@4.6.0 cross-env electron-is-dev electron-squirrel-startup electron-store jsonwebtoken lodash p5 react-p5 react-p5-wrapper os-utils redux react-redux react-router react-router-dom react-bootstrap-icons electron-window-state ; npm i --save ml5 --force ;
```
